DAP Group H

Mentioned below are my contributions to the DAP project:

1) Selected a structured Dataset from Kaggle with 1000 rows and 6 columns for the analysis.

2) Stored the dataset programmatically in mongo dB after creating a Collection named "Books".

3) Applied Random forest Machine learning model to the dataset for the analysis.

4) Created a small video demonstration showcasing the flow of my project.

5) Committed my code named StructuredCSV2Code to the Git-hub Repository.

We three of us have made an equal contribution for the project and my contribution was around 33%.
